TECHNICAL RIDER

DJ SET / DJ SET WITH LIVE ELECTRIC GUITAR

01 / DJ SETUP

Players: Minimum 2, preferably 3 x Pioneer CDJ-2000NXS2 or CDJ-3000, linked together.

Mixer: Pioneer DJM-900NXS2, DJM-A9 or DJM-V10.

Recording: Please keep the mixer's REC OUT available for my own recorder.

02 / MONITORING & BOOTH

Two monitor speakers, one on either side of the artist, preferably at ear height. Monitor volume must be adjustable from the DJ position.

Sufficient lighting at the equipment and a technical contact on site.

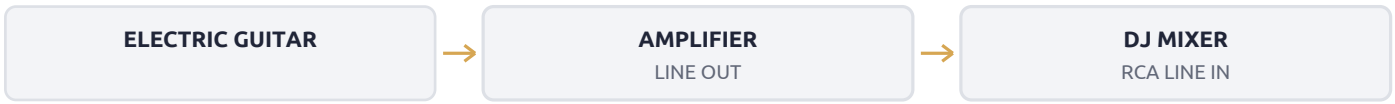

03 / ADDITIONAL REQUIREMENTS FOR LIVE GUITAR

I bring: Electric guitar, amplifier, guitar stand and the cable connecting the amplifier's line output to the DJ mixer.

Input: One free RCA line input on the mixer, preferably on channel 1 or 4. Please coordinate channel assignments for a third deck in advance.

Space: An additional 35 x 20 cm of table space next to the DJ setup for the amplifier, plus space for the guitar stand.

Power: 3 available 230-V power outlets within easy reach, e.g. on a power strip.

SETUP & SOUNDCHECK

Sets with live electric guitar require 15 minutes for setup and soundcheck.

Please agree any equipment substitutions in advance.
